43rd AIVC

11th TightVent & 9th venticool Conference

Ventilation, IEQ and health
in sustainable buildings

October
4-5
2023

Copenhagen
Denmark

Conference Scope

As we spend most of our time in commercial and residential facilities, it is important for our society to look at how these spaces impact the environment and the people in them. This task is important for building and facility managers, maintenance managers, energy managers as well as expert and researcher concerned with adopting sustainable and healthy practices for an organization.

From indoor environmental quality point of view, sustainable buildings prioritize the quality of life and the wellbeing of the buildings' occupants and at the same time reduce negative environmental impacts. A building that, in its design, construction or operation, reduces negative impacts on our climate, also reduces their occupants' risk of related health problems and provides a more pleasant indoor environment, as well as increases occupants' satisfaction.

The conference organisers welcome contributions on the role of smart ventilation, building and ductwork airtightness and ventilative and resilient cooling on IEQ and health in sustainable buildings.

Conference Venue

The conference will be held in Copenhagen at the premises of Aalborg University

Conference Concept

The conference will consist of 3 parallel sessions largely devoted to:

1. **Smart ventilation, Indoor Air Quality (IAQ) and health**
2. **Building and ductwork airtightness**
3. **Ventilative cooling - Resilient cooling**

Professional Congress Organizer

CONVIN S.A.

29 K. Varnali str. 15233 Chalandri, Greece
