

AIVC Workshop Webinar 2

IAQ and Ventilation Metrics

Thursday April 8th, 2021

09:00-10:30 (Brussels, BE)

08:00-09:30 (London, UK)

15:00-16:30 (Beijing, CN)

16:00-17:30 (Tokyo, JP)

17:00-18:30 (Sydney, AU)

REGISTER NOW

FREE – Participation to the Webinar is free

Registration is required: A link to join the webinar will be included in the email confirmation.

The AIVC in collaboration with IEA EBC Annex 86 are organizing a workshop consisting of a series of four webinars on:

- April 1st, 2021 (17:00-18:30 CET): Building ventilation: How does it affect SARS-CoV-2 transmission? ([Register now](#))
- **April 8th, 2021 (09:00-10:30 CET): IAQ and Ventilation Metrics ([Register now](#))**
- April 13th, 2021 (17:00-18:30 CET): Big data, IAQ and ventilation ([Register now](#))
- April 21st, 2021 (09:00-10:30 CET): Big data, IAQ and ventilation – part 2 ([Register now](#))

In this webinar, we discuss the road towards a robust comprehensive IAQ metric for the assessment of the performance of ventilation. It sets the starting stage for subtask 1 of the new IEA EBC Annex 86 'energy efficient IAQ management in residential buildings'. After a short introduction, the three speakers will first look at the open issues that remain after the work in Annex 68, then explore methodological updates, future potential and limitations for the DALY method included in the suite of metrics proposed by that annex and finally discuss the newly proposed TAIL rating scheme. After all this, there is time for discussion and input for future work.

This webinar is organized by the Air Infiltration and Ventilation Centre (<https://www.aivc.org/>) & the IEA EBC Annex 86 "Energy Efficient Indoor Air Quality Management in Residential Buildings" (<https://annex86.iea-ebc.org/>). The webinar is facilitated by INIVE (<http://www.inive.org/>).

Programme (Brussels time)

- ✚ 09:00 | Introduction, **Jelle Laverge – EBC Annex 86 Operating Agent, Ghent University, Belgium**
- ✚ 09:10 | Annex 68 IAQ metrics: what was proposed, what works, what not, what are the remaining questions? **Marc Abadie – University of La Rochelle, France**
- ✚ 09:30 | DALY as an integrated IAQ metric: methodological updates, **Benjamin Jones – University of Nottingham, UK**
- ✚ 09:50 | TAIL a new rating scheme of indoor environmental quality, **Pawel Wargocki – DTU, Denmark**
- ✚ 10:10 | Questions and Answers
- ✚ 10:30 | Closing & End of webinar

Cost and registration

Participation to the webinar is free but requires you to register for the event. The webinar will be limited to a maximum of 1000 persons. To register, please click on the "Register now" button above.

What is a webinar?

A webinar is a conference broadcasted on internet. To follow a webinar you must have a computer with a sound card and speakers or headphones. Once logged in the "conference room", you will be able to see the slides of the presentation and to hear the panellists' comments. You will also be able to ask written questions to the speakers, and to answer on-line surveys.

Hardware, software

Our webinars are powered by WebEx Event Center. The only thing you need is a computer with a sound card and speakers. Before you can log in the "conference room", WebEx will install the required application. If you are not a WebEx user, please visit www.webex.com/login/join-meeting-tips to check the system requirements and join a test meeting. Please also join the event at least 15 minutes in advance.

About AIVC

Created in 1979, the Air Infiltration and Ventilation Centre (www.aivc.org) is one of the projects/annexes running under the International Energy Agency's Energy in Buildings and Communities (IEA-EBC) Programme. With the support of its member countries as well as key experts and two associations (REHVA, IBPSA, ISIAQ), the AIVC offers industry and research organisations technical support aimed at better understanding the ventilation challenges and optimising energy efficient ventilation.

The AIVC activities are supported by the following countries: Australia, Belgium, Brazil, China, Denmark, France, Greece, Italy, Ireland, Japan, Netherlands, New Zealand, Norway, Republic of Korea, Spain, Sweden, UK and USA.

About EBC Annex 86 - Energy Efficient Indoor Air Quality Management in Residential Buildings

Annex 86 Energy Efficient Indoor Air Quality Management in Residential Buildings (<https://annex86.iea-ebc.org/>) is an international research project of the IEA Energy in Buildings and Communities (EBC) programme. The goal of this annex is to work in an international collaboration to create an integrated general assessment method to operationalize the air quality approach suggested by IEA EBC Annex 9 to support the development, rating and implementation of innovative and highly energy efficient IAQ management strategies. An IAQ management strategy is understood to be any coherent set of measures by a stakeholder in the building that aims to improve IAQ. Annex 86 aims to improve the energy efficiency of the IAQ management strategies in operation and to improve their acceptability, control, installation quality and long-term reliability.

About INIVE

INIVE EEIG (International Network for Information on Ventilation and Energy Performance) was created in 2001 as a so-called European Economic Interest Grouping. The main reason for founding INIVE was to set up a worldwide acting network of excellence in knowledge gathering and dissemination. At present, INIVE has 8 member organisations (BBRI, CETIAT, CSTB, eERG, IBP-Fraunhofer, NKUA, SINTEF, and TNO) (www.inive.org)

INIVE is coordinating and/or facilitating various international projects, e.g. AIVC (www.aivc.org), TightVent Europe (www.tightvent.eu), venticool and Dynastee (www.dynastee.info). INIVE has also coordinated the ASIEPI project dealing with the evaluation of the implementation and impact of the EU Energy Performance of Buildings Directive, the QUALICHeCK project aiming towards improved compliance and quality of the works for better performing buildings, BUILD UP the European portal on Energy Efficiency and the EPBD feasibility study 19a (<https://www.epbd19a.eu/>).
